**Tugra Söve**  
Dekoratif Cephe Süslemeleri

Tuğra Söve kurulduğu 2010 yılından bu yana dış cephe dekoratif ürünler konusunda modern tasarım anlayışı, kalite ve maliyet açısından sektörün yenilikçi ve rekabetçi yüzü olmuştur.

Tuğra Söve yapıların modernliği ve estetiği üzerine ihtisas yapmış ekibi, uzman teknik personelleri ve çağdaş ayak uyduran ekipmanlarıyla müşterilerine hizmet vermeye devam etmektedir. Firmamız iş ve işçi güvenliğine önem veren, çevreye duyarlı ve kalitenin ön planda olduğu bir üretim politikası izlemektedir.

Söve imalatının yanı sıra firmamız, dış cephe kaplamaları, balkon süsleri, enjeksiyon baskı gibi birçok alanda üretim yapmakta ve yüksek kaliteli ürünleriyle müşterinin memnuniyetini sağlamayı hedeflemektedir.

Misyonumuz, ürünlerimizin ve üretim anlayışımızın getirdiği sorumlulukları, müşterilerimizin güvenini, malzemelerimizin sürdürülebilirliğini ve modern yapıların estetik görünüşlerini kusursuz bir biçimde sağlamak ve tüm taahhütlerimizi yerine getirmenin öncelikleridir.

Vizyonumuz, sürdürülebilir çözümlerimizin getirdiği anlayışı uzun yıllar ve dinamik bir şekilde sürdürmek ve tüm sektör ihtiyaçlarını hızlı tedarik ve kaliteli üretim anlayışıyla karşılamaktır.

Tecrübesine her geçen gün yeni tasarım ürünler ekleyerek sektörün öncü firmalarından olan Tuğra Söve, uygun fiyatlı ürünleri ile kaliteden ödün vermeden pazarda yer almaya devam etmektedir.

Since its foundation in 2010, Tuğra Söve has been the innovative and competitive face of the sector in terms of modern design understanding, quality and cost in exterior decorative products.

Tuğra Söve continues to serve its customers with its team specialized in modernity and aesthetics of buildings, expert technical personnel and equipment that keeps up with the times. Our company follows a production policy that attaches importance to work and worker safety, is sensitive to the environment and prioritizes quality.

In addition to the jamb production, our company manufactures in many areas such as exterior cladding, balcony decorations, injection printing and aims to ensure customer satisfaction with its high quality products.

Our mission, the responsibilities of our products and our understanding of production, are the priorities of ensuring the trust of our customers, the sustainability of our materials and the aesthetic appearance of modern buildings, and fulfilling all our commitments.

Our vision is to maintain the understanding brought by our sustainable solutions dynamically for many years and to meet all the needs of the sector with an understanding of fast supply and quality production.

Tuğra Söve, one of the leading companies in the sector by adding new design products to its experience every day, continues to be in the market with its affordable products without sacrificing quality.

## SÖVE NEDİR ?

Söve dış cephe süsleme ve kaplama malzemesi olarak kullanılan başlıca dekor ürünlerindenidir. Hem dekorasyon hem mantolama sistemleri özelliğine sahip, eps ve straför gibi malzemelerden oluşturulan üzeri mineral temelli malzemelerin karışımı olan, akrilik diye adlandırdığımız her renge boyana bilen, sınırsız modelli bir dekorasyon ve dış cephe ürünüdür.

Cephennizde uygulanacak olan söve ebatları ne kadar büyük olurlarsa olsunlar yapıya ek bir yük bindirmediginden yapının statığını etkilememektedir bu nedenle precast muadili uygulamaları karkas uygulamasına gerek kalmaksızın uygulama kolaylığı sağlamakta ve sınırsız tarihi mimari çalışmalar ile yapılarınıza değer katmaktadır.

## SÖVE NERELERDE KULLANILIR ?

Günümüzde dış cephe haricinde iç yüzeylerde de kullanılmaya başlanmıştır. En fazla kullanıldığı yerler, dış cephe pencere etrafları, alt denizlikleri, balkon kapıları çevresi, çatı saçak altları, kat silmeleri, mantolama fugaları ve komple dış cephe kaplamalarıdır.

## SÖVE NASIL ÜRETİLİR ?

Söve eps bloğunun kesilerek üzerine akrilik esaslı sıvanın kaplanmasıından üretilir. CNS ve Router makinelerde çizikten sonra ilaçlanır. İlaçlanma işlemi tamamlanınca kumlanır ve kurutulur. Petrolden elde edilen eps bloklar ısı yalıtım malzemeleridir.

## WHAT IS JAMB?

The jamb is one of the main decorative products used as exterior decoration and coating material. It is a decoration and exterior facade product with an unlimited model, which has both decoration and sheathing systems, is a mixture of mineral-based materials such as eps and styrofoam, can be painted in any color we call acrylic.

No matter how large the size of the jambs to be applied on your facade, it does not impose an additional load on the structure, so it does not affect the static structure of the building, therefore precast equivalent applications provide ease of application without the need for frame application and add value to your buildings with unlimited historical architectural works.

## WHERE IS JAMB USED?

Nowadays, it has started to be used on interior surfaces besides the exterior. The places where it is mostly used are window sills, bottom windowsills, around balcony doors, under roof eaves, floor moldings, sheathing joints and complete exterior cladding.

## HOW IS JAMB PRODUCED?

The jamb is produced by cutting the EPS block and coating it with acrylic-based plaster. It is sprayed on CNS and Router machines after scratching. When the application is completed, it is sandblasted and dried. EPS blocks obtained from oil are thermal insulation materials.
